

Evergreen 2.0 Software Update

The Evergreen 2.0 software update brings many new and improved features to the Evergreen ILS. On Sunday, March 20, Evergreen Indiana will be upgraded to the 2.0 software update. The update will allow both customers and staff to do more than ever with Evergreen.

Staff Client Features-Misc.

Checkin Modifiers

The screenshot shows the Evergreen ILS staff client interface. At the top, there is a navigation bar with menu items: file, Edit, Search, Circulation, Cataloging, Acquisitions, Booking, Admin (C), and Help. Below this is a toolbar with icons for Check Out, Check In, Search Catalog, Item Status, Patron Search, and Patron Registration. The main content area is titled 'Check In / Process Item' and features a prominent red button labeled 'Amnesty Mode / Forgive Fines'. Below this, there is a 'Check In' section with an 'Enter Barcode:' field and a 'Submit' button. To the right of the barcode field is an 'Effective Date' dropdown menu set to '02 / 28 / 2011' and an 'Actions for Selected Items' dropdown. A table with the following columns is visible: Alert Message, Balance Owed, Barcode, Bill #, Call Number, Checkin Date, Family Name, Finish, Location, Route To, Start, and Title. At the bottom of the interface, there are several buttons: 'List Actions', 'Print List', a checked checkbox for 'Trim List (20 rows)', an unchecked checkbox for 'Strict Barcode', and a 'Checkin Modifiers' button. A large red arrow points to the 'Checkin Modifiers' button.

Checkin modifiers are an easy way to set your check-in screen to forgive fines on days following bad weather or other amnesty days. Use toggle button in bottom right corner to add/delete modifiers to your check-in screen.

Alert

List Actions - Trim List (20 rows) Strict Barcode Auto-Print Hold and Transit Slips

Now from Item Status screen (F5) staff can see quick statistical info about an item, including total circs, current year circs and owning library. This info can be easily navigated by switching from List View to Alternative View, using the toggle button in the right corner.

Text based MARC editing

This 2.0 feature will allow catalogers to quickly edit MARC records, or paste in records from third-party sources, providing they are correctly formatted.
